

## FOR IMMEDIATE RELEASE

### Midwest Employers Casualty Celebrates 40 Years of Making a Difference

CHESTERFIELD, MO --(BUSINESS WIRE)-- **Midwest Employers Casualty (MEC)**, a leading provider of excess workers' compensation and captive solutions, is celebrating its 40th anniversary, marking four decades of innovation, strong industry relationships, and a deep commitment to improving outcomes for employers and injured workers nationwide. Throughout its history, MEC has maintained a customer-centric focus, ensuring that the needs of agents, insureds, and their injured employees remain at the center of every decision.

Founded in 1986, MEC set out with a clear mission: deliver specialized expertise, service excellence, and results-driven support to self-insured employers and groups navigating complex catastrophic workers' compensation claims. From the beginning, the business distinguished itself through technical depth, trusted collaboration with agents, insureds and third-party administrators, and a philosophy that doing the right thing leads to better results for all stakeholders.

*"MEC was founded with a bold vision to carve out a niche in the self-insured market and deliver superior outcomes through knowledge, integrity, and innovation,"* said MEC President Scott McDonough. *"Our journey has been defined by our competitive advantage known as The MEC Difference."*

In 1995, MEC joined W. R. Berkley Corporation, one of the nation's premier commercial property and casualty insurance providers. This strengthened MEC's financial foundation, expanded its capabilities, and supported long-term growth while maintaining its specialty focus and customer-centric approach.

Over the past four decades, MEC has evolved into a nationally recognized leader in excess of loss workers' compensation products and services, known for advanced analytics, innovative risk-management tools, industry-leading claims expertise, and captive solutions. Today, MEC continues to invest in technology, data-driven insights, and service enhancements that help employers reduce their total cost of risk and improve outcomes for injured workers.
